***Restriction / Election Requirement***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-67, drawn to a compound of formula I and to a process of applying the composition comprising a compound of formula I to skin, classified in class 514, subclass 947.
- II. Claims 68-71, drawn to a process of structuring the composition comprising a compound of formula I in the form of a solid or gel, classified in class 514, subclasses 944,947.
- III. Claim 72, drawn to a process of making a dye comprising a compound of formula I, classified in class 514, subclasses 844,880,887.
- IV. Claim 73, drawn to a method of making a make-up product comprising a compound of formula I, classified in class 514, subclass 844,845.

Inventions I and II and III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions have different functions.

Because these inventions are distinct for the reasons give above and the search required for one invention is not required for all inventions restriction for examination purposes as indicated is proper.

Art Unit: 1616

Applicant is advised that the reply to this requirement to be complete must include an election of the invention (**I or II or III or IV**) to be examined even though the requirement be traversed (37 CFR 1.143).

This application contains claims directed to the following patentably distinct species of the claimed invention: Numerous compounds, compositions and method comprising a compound of instant formula I.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, a composition or process comprising a compound of formula I is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1616

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention (**a specific completely defined compound of formula I**) to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
